 Vyazemsky lane 5-7, Saint-Petersburg, Russian Federation  +7(910)-267-69-54

EDUCATION

ITMO University, Russian Federation
Computer Technologies Department, Bachelor

Sep 2019 - Aug 2023

TECHNICAL SKILLS

Java: Experience for several years with Collections, Servlets, Stream, JDBC
Spring: Knowledge of Data, JPA, Security
Other: Familiar with PostgreSQL, Hibernate, JUnit, Mockito

PROJECTS

University homeworks storage (available on Github)

I've stored all my solutions to different tasks during studying in university. You can find there different solutions, such as:

- a lot of Java/C/C++ solutions to "Algorithms and Data Structures", "Discrete Math" and "Mathematical Logic" labs;
- Several arithmetic parser (and not only) implementations in "Programming";
- Solutions on Java to different tasks in "Multithreaded Programming";
- Practising different programming languages, such as Haskell, Swift, Python in "Functional Programming", "iOS Development" and "Linear Algebra";
- and more.

Other projects

There are several projects I've been working on:

- human resources management system - web app that provides useful interface for control people working on different warehouses;
- flow for checking new warehouse personnel;
- personal cabinet for warehouse personnel;
- automation of billing team processes;
- other tasks for the maintenance and development of projects.

Unfortunately, the code of these projects is private because of NDA.

WORK EXPERIENCE

Yandex, Saint-Petersburg

April 2021 - now Backend Developer

I was working on management system of warehouses and sorting centers of marketplace. I was developing new functionality for calculating employees' salaries, creating various monitoring systems for monitoring the operation of the application, optimizing and developing synchronization of various components of the application.
